FYI. This is what happens when you don't get fully coordinated. Missy has already sent a note that George understands that he is to coordinate though Eric.

**Subject:** Radiological Emergency Response Team (RERT) Conference Call

Good afternoon and the following information is from today's conference call.

Greg Fife is the R6 OSC for this event.

DOE called EPA HQ to provide radiation monitoring for the state. Gregg Dempsey is RERT Team Commander from our Las Vegas, NV lab. Will arrive in LANL today from Flagstaff, AZ and will make a monitoring plan with Greg Fife. Gregg is driving the mobile command post and some "medium-volume" air samplers to work with NMED and DOE.

Fire is NOT on LANL property! This fire is 9,000 acres large (bigger than Cerro Grande fires from 2000) and the radiation concern is due to the plutonium in soils from "Manhattan Project" days.

ASPECT will fly to Santa Fe, NM for aerial monitoring. Will conduct two flights/day. Conduct ground mapping/air sampling.

Additional conference calls will occur if needed!
